

TWINDOM

STEP INTO THE FUTURE

TWINDOM FULL BODY SCANNER

Designed to create, render, rig, and animate life-like avatars of humans and pets!

- Easy to use. No 3D experience required.
- Fast set up. Less than 15 minutes.
- In-studio or mobile. Scan everyone, everywhere!

Easy Set Up & Use

Plug and play operation and user-friendly software. Scanner sets up in less than 15 minutes by 1 person.

Instant Capture

Take scans in less than a second! It works like taking a regular photo, only in 3D! Perfect for kids and pets.

High Quality Cameras

This scanner has custom cameras that are 12 megapixels and have glass lenses. This produces clear and consistent photos from each camera every time.

Runs on Apple Devices

Powerhouse performance and reliability. Tackles intense 3D tasks with ease to scan and render high detailed avatars at lightning fast speed!

Auto Calibration

The scanner auto calibrates on set up and includes options to alter complex settings with the touch of a button to manage difficult scanning scenarios with ease.

Mobile Friendly

The scanner packs into travel cases that can fit in a hatchback or SUV. Easy transport makes it ideal for events.

Ideal Scan Environment

With a custom scanner wrap and calibrated LED lights, you can be assured the scanning environment will be just right every time at any location.

Time Tested

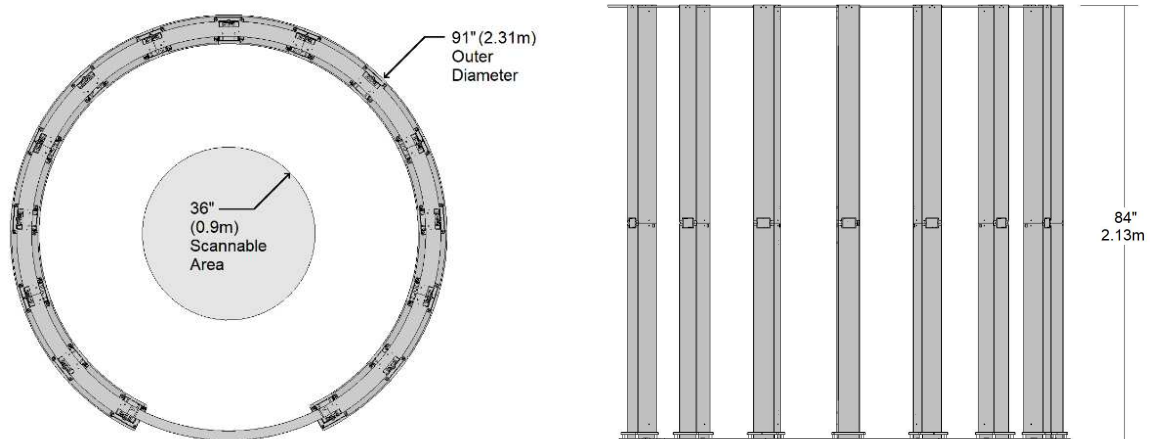

With over 200 scanners sold since 2014, our scanner has been proven to be the ideal solution to scan humans and pets!
